Pump It Up <b>CX</b>	YES	N/A
Pump It Up <b>TX</b>	YES	N/A
Pump It Up <b>FX</b>	NO <sup>3</sup>	YES

1. MK9 is Andamiro's latest Pump It Up computer consisting of an Intel Celeron processor, RAM and NVIDIA GeForce graphics board.

2. Earlier PIU versions featured SD (standard-def) monitors, and PIU-XX does not support SD. However, some older machines, especially the SX, GX and DX models, were upgraded with HD (high-def) monitors and/or MK9 boxes, and these may likely support PIU-XX software; updating these cabinets will need to be addressed case-by-case.

3. Exception: FX cabinets already updated to MK9 boxes may be compatible with "upgrade *without* main box." Please call.

Questions? Please email Andamiro USA's support departments at [service@andamirousa.com](mailto:service@andamirousa.com) or [parts@andamirousa.com](mailto:parts@andamirousa.com), or call us at (310) 767-5800 and enter 2 for service or 3 for parts. When contacting us about Pump It Up upgrades, please provide the serial number of the game you wish to update. To help expedite your query, please take a photo of the white factory origin and game ID label on the back of the game and the cabinet itself, and send those photos to the Andamiro agent assisting you.
